EDUCATION

2024 - 2028

B.S. ABDUR RAHMAN CRESCENT INSTITUTE OF SCIENCE AND TECHNOLOGY

- B. TECH - Computer Science Engineering

LANGUAGES

- English (Fluent)
- Tamil (Fluent)
- Hindi (Fluent)

SKILLS

Full Stack Development:
React.js, Next.js, TypeScript, Node.js

Backend & APIs:
Express.js, Flask, REST APIs, WebSocket

Programming:
Python, JavaScript, Java, C++

Computer Vision:
OpenCV, MediaPipe

Embedded & IoT:
Microcontroller Programming, Motor Control Systems, Wireless Communication, Sensor Integration

Databases:
MySQL, Firebase

Tools:
Git, GitHub, VS Code, Arduino IDE

PROFILE

Motivated and detail-oriented Full Stack Developer with a strong foundation in web technologies, embedded systems, and IoT solutions. Passionate about building intelligent applications that integrate software and hardware to solve real-world problems. Experienced in developing responsive web applications, working with microcontrollers, and implementing AI-driven features. A quick learner with strong problem-solving skills and a commitment to continuous improvement.

PROJECT EXPERIENCE

Full Stack & IoT Developer — 2026

NEXORA – AI Smart Study Companion

- Built AI-powered productivity platform integrating web and IoT systems
- Designed responsive UI and implemented smart scheduling features
- Integrated automation and intelligent features to enhance user productivity

Full Stack Web Developer

Lebros Café Website — 2026

- Built responsive café website using React.js
- Designed interactive UI for menu and navigation
- Implemented component-based architecture for scalability
- Delivered the project to client based on requirements
- Deployed and maintained using GitHub

IoT & Robotics Developer

Gesture Controlled Robot with Real-Time Dashboard — 2026

TechFusion'26 - B.S. Abdur Rahman Crescent Institute of Science and Technology | 3rd Prize Winner

- Built gesture-controlled robot using OpenCV & MediaPipe
- Integrated NRF24L01 for wireless communication
- Developed system using Arduino Nano, L298N motor driver, and ultrasonic sensors
- Implemented real-time motor control and obstacle awareness
- Built React + Flask dashboard with WebSocket for live monitoring and control

Embedded Systems Developer

Obstacle Detection Robot — 2025

- Designed and developed an autonomous robot capable of obstacle detection and avoidance
- Utilized ultrasonic sensors for real-time distance measurement and navigation decisions
- Programmed Arduino for motor control based on sensor input
- Improved navigation accuracy through calibration and testing

ACHIEVEMENTS

- 3rd Prize – TechFusion'26 (IoT & Robotics Domain)

WORKSHOPS

- Robotics Workshop – IIT Madras Research Park
  Conducted by Techobytes Technologies
