EDUCATION

2024 - 2028

B.S. ABDUR RAHMAN CRESCENT INSTITUTE OF SCIENCE AND TECHNOLOGY

- B.Tech - Computer Science and Engineering

LANGUAGES

- English (Fluent)
- Tamil (Fluent)
- Hindi (Fluent)

SKILLS

Full Stack Development:
React.js, Next.js, TypeScript, Node.js

Backend & APIs:
Express.js, Flask, REST APIs, WebSocket

Programming:
Python, JavaScript, Java, C++

AI & Computer Vision:
YOLO (Object Detection), OpenCV, MediaPipe

Embedded, IoT & Robotics:
Microcontroller Programming, Motor Control, Wireless Communication, Sensor Integration, Robotic Systems

Industrial Automation:
Siemens S7-1200 PLC

Databases:
MySQL, Firebase

Tools:
Git, GitHub, VS Code, Arduino IDE

MOHAMMED AADIL

FULL STACK DEVELOPER | SOFTWARE ENGINEER | AI, IOT & ROBOTICS DEVELOPER

PROFILE

Computer Science Engineering student and Full Stack Developer with hands-on experience across web technologies, AI/computer vision, embedded systems, robotics, and industrial automation. Has worked on quadruped, humanoid, and robotic-arm platforms in an R&D lab, built PLC-based automation with Siemens S7-1200, and develops YOLO-based vision systems. Passionate about building intelligent applications that integrate software and hardware to solve real-world problems; a quick learner with strong problem-solving skills.

WORK EXPERIENCE

Innovation World Creator – Coding & Robotics Intern Apr - Aug 2026
Edutainal Ventures | CIIC, B.S. Abdur Rahman Crescent Institute

- Worked in the R&D lab on a quadruped robot, an AI humanoid robot, and a robotic arm.
- Designed and prototyped embedded systems using Arduino, sensors, and microcontrollers.
- Contributed to robotics software using Python, C++, and web technologies; tested and troubleshot robotics solutions.
- Supported hands-on robotics workshops, technical documentation, and product demonstrations.

Industrial Automation Intern (Summer Internship) Jun - Jul 2026
Siemens Centre of Excellence | MIT Campus, Anna University

- Completed 2-week training in industrial automation using the Siemens S7-1200 PLC.
- Project: designed and built a PLC-based automatic bottle filling and capping plant.

PROJECT EXPERIENCE

AI & Computer Vision Developer November - 2026
AeroSpectra – AI Aircraft Surface Defect Detection
T-Hub BuildX Hackathon

- Building an AI-powered aircraft inspection platform that analyses drone-camera footage of aircraft surfaces.
- Uses YOLO object detection to identify and localise surface defects automatically.

IoT & Robotics Developer April - 2026
Gesture Controlled Robot with Real-Time Dashboard
TechFusion'26 – B.S. Abdur Rahman Crescent Institute | 3rd Prize Winner

- Built gesture-controlled robot using OpenCV & MediaPipe, with NRF24L01 wireless communication.
- Developed with Arduino Nano, L298N motor driver, and ultrasonic sensors for real-time motor control and obstacle awareness.
- Built React + Flask dashboard with WebSocket for live monitoring and control.

Full Stack & IoT Developer April - 2026
NEXORA – AI Smart Study Companion

- Built AI-powered productivity platform integrating web and IoT systems.
- Designed responsive UI and implemented smart scheduling and automation features.

Full Stack Web Developer March - 2026
Lebros Café Website (Client Project)

- Built responsive café website using React.js with an interactive menu and component-based architecture.
- Delivered to the client based on requirements; deployed and maintained using GitHub.

Embedded Systems Developer November - 2025
Obstacle Detection Robot

- Designed an autonomous robot that detects and avoids obstacles using ultrasonic sensors.
- Programmed Arduino motor control from sensor input; improved navigation accuracy through calibration.

ACHIEVEMENTS

- 3rd Prize – TechFusion'26 (IoT & Robotics Domain) April - 2026

WORKSHOPS & TRAINING

- Industrial Automation (Siemens S7-1200 PLC) – Siemens CoE, MIT Campus Jun - Jul 2026
- Robotics Workshop – IIT Madras Research Park (Techobytes Technologies) October - 2025
